AUTHOR INDEX TO VOLUME 19

Aston, A. R.–
See Dunin, F. X. 113
Aylmore, L. A. G.–
See also Murali, V. 23
Aylmore, L. A. G., and Murali, V.–
A convective-dispersive-adsorptive flow model for solute transport in soils. II. Evaluation of single and two-component adsorption models for phosphate movement in soils 287

Barrow, N. J., Bowden, J. W., Posner, A. M., and Quirk, J. P.–
Describing the adsorption of copper, zinc and lead on a variable charge mineral surface 309
Blackburn, G.–
Particle-size analyses of Widgelli parna in south-east Australia 355
Boggio, L.–
See Tshapek, M. 209
Boughton, W. C.–
See also Freebairn, D. M. 133
Boughton, W. C., and Freebairn, D. M.–
Variations in unit hydrographs on a very small agricultural catchment 121
Bowden, J. W.–
See also Barrow, N. J. 309
Briggs, G. G.–
Adsorption of pesticides by some Australian soils 61

Campbell, C. A., Myers, R. J. K., and Weier, K. L.–
Potentially mineralizable nitrogen, decomposition rates and their relationship to temperature for five Queensland soils 323
Chartres, C. J., and Costin, A.B.–
Buried soil cracks in alluvium near Braidwood, N.S.W. 255
Childs, C. W.–
Field tests for ferrous iron and ferric-organic complexes (on exchange sites or in water-soluble forms) in soils 175
Claridge, G. G. C.–
See Russell, M. 185
Clarke, A. L.–
See Lewis, D. C. 167
Costin, A. B.–
See Chartres, C. J. 255

Datta, B., and Singh, O. P.–
Comparative study of moisture release behaviour of soils, soil clays and pure clays 79

Dunin, F. X., and Aston, A. R.–
Spatial variability in the water balance of an experimental catchment 113

Freebairn, D. M.–
See also Boughton, W. C. 133
Freebairn, D. M., and Boughton, W. C.–
Surface runoff experiments on the eastern Darling Downs 133

Gillman, G. P.–
Effects of pH and ionic strength on the cation exchange capacity of soils with variable charge 93

Hall, W. B.–
See Lewis, D. C. 167
Higginson, F. R.–
See Maguire, M. 217
Holford, I. C. R.–
Changes in nitrogen and organic carbon of wheat-growing soils after various periods of grazed lucerne; extended fallowing and continuous wheat 239
Holford, I. C. R., and Patrick, W. H. Jr–
Effects of duration of anaerobiosis and reoxidation on phosphate sorption characteristics of an acid soil 69

Johnston, J. H., and Norrish, K.–
A ^{57}Fe Mossbauer spectroscopic study of a selection of Australian and other goethites 231
Jones, M. J.–
See Watson, K. K. 265

Kanchanasut, P.–
See Scotter, D. R. 299
Kar, S.–
See Samui, R. P. 51
Kaushik, B. D.–
See Subhashini, D. 361
King, P. M.–
Comparison of methods for measuring severity of water repellence of sandy soils and assessment of some factors that affect its measurement 275
Koppi, A.–
Microanalytical evidence for short range clay coatings in weathered grandiorite 251

Lewis, D. C., Clarke, A. L., and Hall, W. B.–
Factors affecting the retention of phosphorus applied as superphosphate to the sandy soils in south-eastern South Australia 167

McKenzie, R. M.—
The surface charge on manganese dioxides 41
Maguire, M., Slavek, J., Vimpany, I., Higginson, F. R., and Pickering, W. F.—
Influence of pH on copper and zinc uptake by soil clays 217
Mandal, A. K.—
See Tarafdar, J. C. 181
Mead, J. A.—
A comparison of the Langmuir, Freundlich and Temkin equations to describe phosphate adsorption properties of soils 333
Mullins, J. A.—
Estimation of the plant available water capacity of a soil profile 197
Murali, V.—
See also Aylmore, L. A. G. 287
Murali, V., and Aylmore, L. A. G.—
A convective-dispersive-adsorptive-flow model for solute transport in soils. I. Model, description and some simulations 23
Myers, R. L. K.—
See Campbell, C. A. 323

Norrish, K.—
See Johnston, J. H. 231
Nulsen, R. A.—
Critical depth to saline groundwater in non-irrigated situations 83
Salt-affected land in the Shire of Wongan-Ballidu, Western Australia 87

Oades, J. M.—
See Yeoh, N. S. 147, 159

Parfitt, R. L.—
See Russell, M. 185
Patrick, W. H. Jr—
Holford, I. C. R. 69
Pickering, W. F.—
See Maguire, M. 217
Posner, A. M.—
See Barrow, N. J. 309

Quirk, J. P.—
See Barrow, N. J. 309

Robinson, P. J.—
See Coventry, R. J. 103
Roy, A. B.—
See Tarafdar, J. C. 181
Russell, M., Parfitt, R. L., and Claridge, G. G. C.—
Estimation of the amounts of allophane and other materials in the clay fraction of an Egmont loam profile and other volcanic as soils, New Zealand 185

Samui, R. P., and Kar, S.—
Soil and plant resistance effects on transpirational and leaf water responses by groundnut to soil water potential 51
Scotter, D. R., and Kanchanasut, P.—
Anion movement in a soil under pasture 299
Singh, O. P.—
See Datta, B. 79
Slavek, J.—
See Maguire, M. 217
Stynes, B. A.—
See Veitch, L. G. 13
Subhashini, D., and Kaushik, B. D.—
Amelioration of sodic soils with blue-green algae 361

Tarafdar, J. C., Roy, A. B., and Mandal, A. K.—
Enzyme status of some jute-growing soils of West Bengal 181
Torres Sanchez, R. M.—
See Tschapek, M. 209
Tschapek, M., Boggio, L., Wasowski, C., and Torres Sanchez, R. M.—
The undrainable water in sand 209

Veitch, L. G., and Stynes, B. A.—
A synoptic approach for crop loss assessment used to study wheat. III. Variables derived from soil properties and traditional soil classifications suitable for regression studies 13
Vimpany, I.—
See Maguire, M. 217

Wasowski, C.—
See Tschapek, M. 209
Watson, K. K., and Jones, M. J.—
Estimation of hydrodynamic dispersion in a fine sand using an approximate analytical solution 265
Weier, K. L.—
See Campbell, C. A. 323
Willatt, S. T.—
See Willoughby, P. 343
Willoughby, P., and Willatt, S. T.—
Penetration of pea radicles into saturated soil cores related to organic matter amendments 343

Yeoh, N. S., and Oades, J. M.—
Properties of soils and clays after acid treatment.
I. Clay minerals 147
II. Urrbrae fine sandy loam 159
